We are so happy that we will be able to serve students in person again.

We are working hard to clear the murky waters and get clear answers to all of the new regulations and waivers. The USDA has made all school day meals for all students free until December 31st OR until the funds run out, whichever comes first. **Please be sure to fill out the free and reduced lunch applications so that when we have to start charging for meals again, your student will have a seamless transition and no surprises.**

**Here is how it is going to work.**

We will be in the Atrium in the morning when the students arrive, we will have a couple of breakfast grab and go bags to choose from, they may grab a milk to go with it if they choose to and off they go to their assigned class room.

Lunch will be in the Café that is marked for social distancing. Students will enter the serving line in one of two entrances. They will make their final choices for their meal, check in with the cashier and pay for any al carte items they may have picked up in addition to the meal. Then go to sit in the café or outside under the tent in the courtyard just outside the café.

We are also offering premade salads, Bento box lunches or Sandwich lunches; these options may be picked up at the School Store and then proceed to the lunchroom or outside tent.

**Monday’s** we will be providing meals for curbside pickup for remote Monday and Tuesday remote for M-Z students. Please email me at morgan.trahan@sau24.org to sign up for this service.

**Students may pick up Wednesday through Friday remote meals in the Atrium** before they leave the building for the day.

**FULLY REMOTE STUDENTS-** John Stark, homeschooled or other community member under 18 meal picked up curbside between 10am and 11am Monday, Wednesday and Friday. Please email to sign up for this service at morgan.trahan@sau24.org

The food service staff will prepackage all meals, following all safety precautions suggested by the CDC and USDA.

Masks, shields and social distancing will occur to the greatest extent possible, clear dividers have been installed to protect the serving line area and one way traffic in and out of the serving line is clearly marked.

Thank you for your understanding

If you have any questions, you may contact me at morgan.trahan@sau24.org
